TYPE SCL11A - SCALDALETTO ELETTRICO A UNA PIAZZA OMOLOGAZIONE: **CE**

220/240V~50Hz 60W

Scalda il letto per dormire piacevolmente anche quando la stanza è poco riscaldata. Elimina la sensazione di umidità nelle lenzuola.

Dati tecnici:

- Tessuto in lana sintetica 150x80cm.
- Selettore: 0-20-30-60W.
- Connettore elettrico estraibile, con clip di sicurezza.
- Lavabile in lavatrice.
- Bordi con 4 occhielli per trattenere la coperta distesa sul materasso.

With an electric blanket, you can sleep snugly in the winter even if the room is not heated sufficiently. An electric blanket eliminates the sensation of damp sheets while allowing you to breathe cool air.

Placed directly over the mattress, its warmth rises and envelopes the body, on only one side of the bed or both. It is especially useful when central heating is not on, during convalescence, in a second home at the sea or in the mountains when beds are cold and damp.

- Synthetic wool fabric, 150x80 cm
- Switch, to adjust 0-20-30-60W power for one and/or the other side individually, and to switch off
- The electric cord has a removable connector, to allow the blanket to be washed in the washing machine.
